

# **NEC SCHOTT Components Corporation**

## **Environmental Policy**

### **Environmental Principles**

We will conduct environment management with a view toward environment respecting the working of nature in every business process: development, planning, purchase, production, disposal and sales.

### **Action Plan**

- 1) We will promote resource and energy saving and recycling in all the phases of development, planning, purchase, production, disposal and sales, thus contributing to environmental protection and the reduction of environmental impacts.
- 2) We will continuously strive on the improvement and protection of the environment by adapting and sustaining environmentally aware production and environment management activities including chemicals management.
- 3) We will not only comply with environmental laws and regulations, but also operate our own criteria of control for the advanced environmental conservation.
- 4) We will set environmental objective and targets, which will be reviewed every year in order to exercise our environmental policy.
- 5) We will establish an organization for environment management and EMS in order to exercise our environmental policy, and educate our employees and have them carry a written policy in order to familiarize them with the policy.
- 6) We will openly disclose our environmental policy, contribute to the environmental protection of the local community and promote CSR-oriented management.
