

NEC SCHOTT Components Corporation

Environmental Policy

Environmental Concept

NSC aims to increase the compatibility between production activities and environmental protection by respecting nature and developing environmentally aware management.

Action Plan

- 1.NSC will promote resource and energy saving and recycling in all the phases from production to disposal, thus contributing to environmental protection.
- 2.NSC will continuously work on the improvement and protection of the environment by environmentally aware production and environment management activities.
- 3.NSC will not only comply with environmental laws and regulations, but also set its own criteria of control in order to protect the environment.
- 4.NSC has set environmental objective and targets, which will be reviewed every year in order to exercise its environmental policy.
- 5.NSC has established an organization for environment management and EMS in order to exercise its environmental policy, and educate its employees and have them carry a card in order to familiarize them with the policy.
- 6.NSC will openly disclose its environmental policy and contribute to the environmental protection of the local community.
